INTRODUCTION

Twenty years ago, **Zephyrgold** set out with a vision to transform into a Nigerian foremost indigenous construction and engineering company, committed to customer satisfaction and enhancing value to the industry. The Company has made significant progress during the last few years in this direction. In our pursuit to become more focused, we successfully demerged the consultancy services. We now concentrate on our core businesses of Construction, Turnkey Project Execution, Heavy Engineering, Industrial Machinery, Electrical & Electronics, and, at the same time, accelerate our growth in IT, Engineering & Technology Services.

The changed political scenario in the country has slowed down the pace of economic activity which is a temporary phenomenon. The country is back to growth. The dark clouds seem to have dissipated. Now, there are signs of political stability, equity markets are doing relatively better and the Infrastructure development remains the first priority of the government. The Government's renewed focus on infrastructure in the past few years with capital expenditure allotment brings tremendous optimism in the infrastructure development space. This brings us at an attractive inflection point in our existence.

The company's revenue inched up 19% during the year with profit after tax increasing 24.4%. I am happy to note the improvement both in the top and bottom lines, as it came in the face of one of the most challenging sectorial realities during the last financial year. I would like to thank my entire team for the dedication, loyalty and hard work they put in towards achieving the company's goal and expect them to deliver stronger numbers in the coming years. I seize this opportunity to thank all shareholders, employees, customers, suppliers, vendors, bankers and other stakeholders, who have made our journey since inception smooth and rewarding through their continued support and patronage.

Since inception, the management has accomplished a tremendous achievement in overall growth and diversity of construction projects undertaken and currently in progress. With regard to growth, the Company has established, other than site projects offices, branches in the main areas of construction in Nigeria namely Lagos, Kaduna, Port Harcourt and Abuja serving as Head office. These branches, which have since been fully established, have enable the company to participate in the infrastructural developments and other related construction works for both Federal and State projects as well as to serve and participate in construction works for the oil Industry in addition to the private sector. Through the geographical locations of the main branches, the Company can now cover the whole of Nigeria through its network be it North, South, East or West.

ZEPHYRGOLD

CORPORATE SOCIAL RESPONSIBILITY GOVERNANCE

OUR STRUCTURE

MANAGEMENT

Set clear direction to the continuous development in corporate governance, business ethics, health and safety, the environment, equal opportunity and other social issues.

CSR COMMITTEE

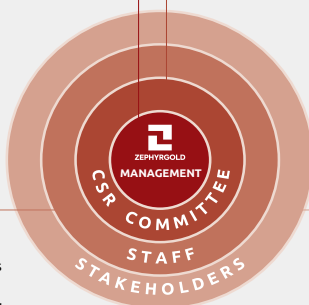

Implement the principles of sustainable development into different aspects of our business and to integrate our individual programmes into a strategic plan under the CSR framework with clear objectives and actions

STAFF

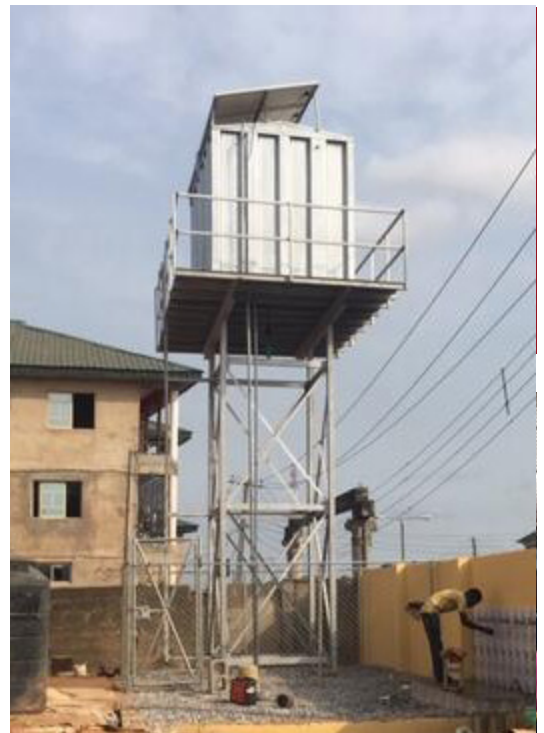

Aspire to manage our impacts on the community and to deliver our social commitment by a series of ongoing initiatives.

STAKEHOLDERS

Connect our stakeholders through our CSR initiatives

Zephyrgold maintains a Corporate Social Responsibility (CSR) Task Force comprising employees across business functions, including internal communications, legal, facilities, marketing and external communications. This group meets bimonthly to advance annual goals and priorities, and to address topics related to sustainability throughout the year. The group's function is to ensure the integration of corporate social responsibility efforts across the business. This team works closely with various departments and communicates with Zephyrgold executive leadership to ensure that CSR policies and initiatives are considered in all aspects of the company businesses. Social corporate responsibility and the maintenance of high ethical standards is not an option but an obligation for all business. What can't be measured can't be improved. That was the spirit behind our effort to concentrate on CSR currently to contribute meaningfully to our immediate environment.

MISSION

To provide active and value added services to clients without compromising on quality and offer high quality work of International standards within given time line.

VISION

To become a bench mark for civil engineering project in construction of building, roads, dams, institutions, bridges, highways, and real estate development.

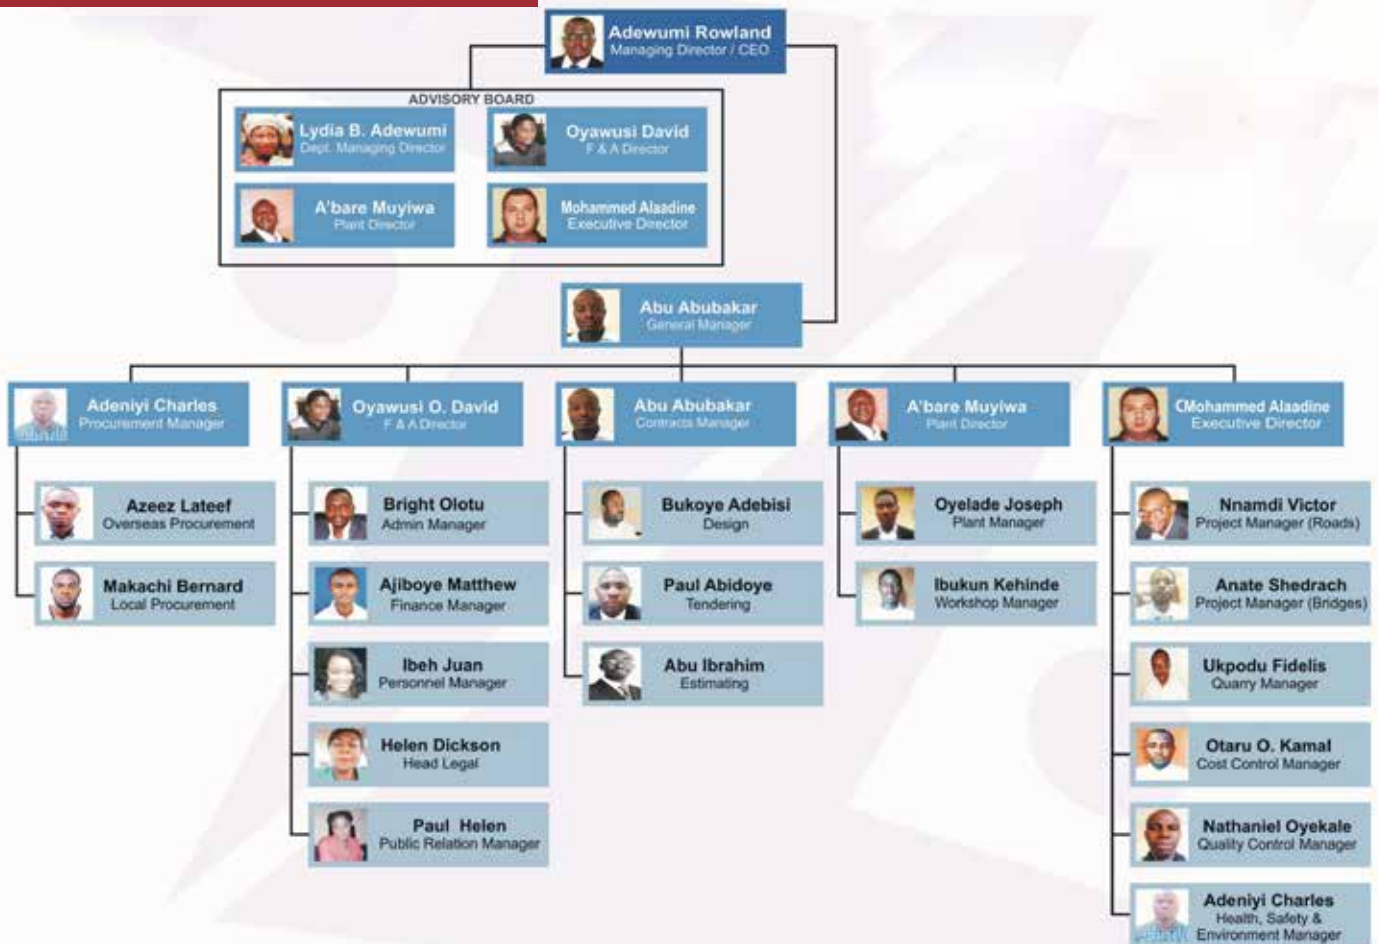

CLIENTS

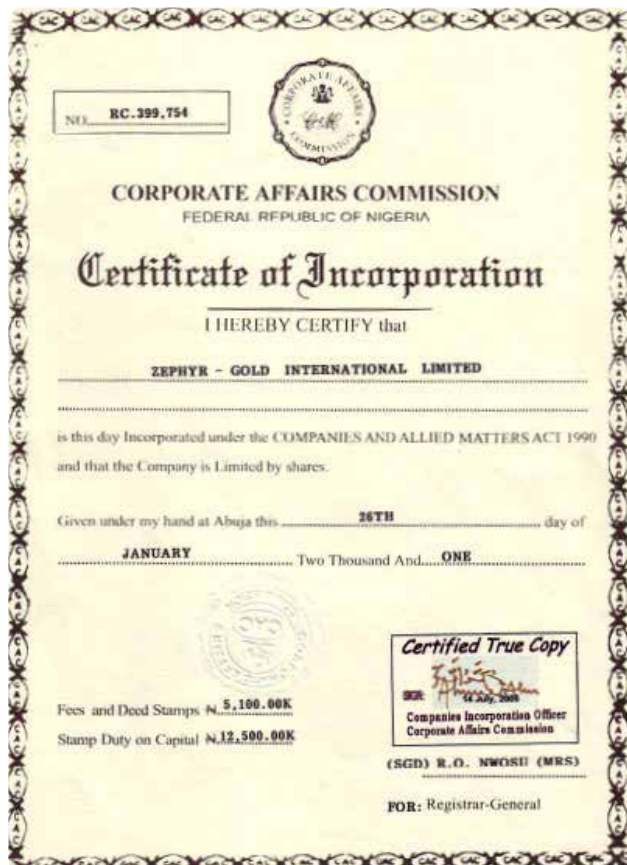

Save the Children.
